HAM EXPO

Though the Saturday morning rain reduced attendance it was still a great event.

A huge thank you to all that volunteered. Ham Expo would not be possible without everyone's help.

Annual Armed Forces Day (AFD) Crossband Test Saturday May 10, 2025.

The event will test two-way communications between military stations and amateur radio operators. The tests provide opportunities — and challenges — for operators to test their individual technical skills in a controlled scenario that will not impact public or private communications. The annual DOD message will be transmitted via RTTY on 14,667 kHz at 1400 and 2000 UTC. Military stations will transmit on selected military frequencies and announce the specific amateur radio service frequencies that will be monitored. All scheduled times will be in UTC, and all scheduled frequencies will be upper sideband (USB), unless otherwise noted. Information on frequencies, times, and other technical information can be found at [DoD MARS - Armed Forces Day](#).
